

Factory of the Future

**Bosch Australia
Manufacturing Solutions**

BOSCH

Factory of the Future

As the world of manufacturing demands smarter and more connected solutions, Bosch are trailblazing as a global provider and user of **Industry 4.0** solutions.

We digitalise the factory of the future

Industry 4.0 is when factories can be adapted to any requirements and learn independently at the same time. At **Bosch Australia Manufacturing Solutions(BAMS)**, we combine the best of people, data, and machines from Bosch global network to achieve Industry 4.0.

While artificial intelligence and advanced algorithms make processes simpler, people still have full control over everything that happens. Industry 4.0 is the factory of the future, prioritising that manufacturers work smarter, but not harder.

Higher Productivity

Human and Robot
Collaboration

Easily Scalable to any
Size or Structure

Improved Resource
Efficiency

Traceable System

AI Enabled Potential

Data Driven

Higher Quality Output
